

PROFILE

Full-stack software engineer with over seven years of remote experience designing, building, and maintaining production web applications for companies and clients. I specialize in React, Next.js, and TypeScript on the frontend and Node.js with Fastify on the backend, working in monorepo setups and integrating AI into both products and development workflows. I am driven to take on greater technical ownership, from system architecture to product direction, and to build software that scales with the business.

EXPERIENCE

Software Engineer · Jameia dot com

Nov 2022 – Present

Remote

- Own production web apps end to end with React, Next.js, Tailwind CSS, Express, Fastify, and monorepos — from features and APIs through release and maintenance.
- Design and operate backend services and data access layers, then ship, deploy, and fix issues in production.
- Add AI integrations to product workflows and use AI-assisted development to implement, debug, and maintain the codebase.

Backend Developer · Scorpuling

Sep 2022 – Oct 2022

Remote · Contract

- Built backend services for **Astellation**, a visit-tracking and scanning product in the same space as Popl (digital cards, visits, and related check-in flows).
- Worked in a MERN stack (MongoDB, Express, React, Node.js), focusing on API design, data models, and server-side features that powered scanning and visit workflows.

Full-Stack Developer · EB Informative

Mar 2021 – Feb 2022

Remote

- Designed, built, and managed websites for the company and its clients, covering both frontend and backend.
- Delivered and maintained sites with PHP, Laravel, and WordPress, including custom features, content structure, debugging, and ongoing updates.

Freelance Software Developer · Independent

2018 – Present

Remote

- Build and maintain web applications for clients alongside full-time roles, from new products built from scratch to debugging and fixing existing systems.
